1. Title of Best Practice: Women empowerment through education

2. The context that required the initiation of the practice:

In the ancient Indian society women were adored and worshiped as goddesses. However in the middle age, the status of women got down to a great extent. Women's Empowerment has been an issue of immense discussions and contemplation over the last few decades world-wide. In the history of human development, woman has been as important as man. In fact, the status, employment and work performed by women in society is the indicator of a nation's overall progress. Without the participation of women in national activities, the social, economic or political progress of a country will be stagnated. Women constitute half of the humanity, even contributing two-thirds of world's work hours. Women constitute nearly 50 per cent of population, perform two-thirds of the work and produce 50 per cent of food commodities consumed by the country. They earn one third of remuneration and own 10 per cent of the property or wealth of the country. Sexual harassment is conceivable matter at various places.
